

Upgrade the old.
Build the new
Accelerate business transformation

EdgeReady Cloud makes building, modernizing, and maintaining even the most complicated SAP custom business processes easy.

Pillir's EdgeReady Cloud is an SAP-optimized low-code rapid application development and integration platform. It enables users to enhance speed to market and optimize time, effort, and capital spent on innovation by modernizing their legacy business processes in complex SAP landscapes.

LOWERED BY
30%
 Total cost of ownership by reducing technical debt

FASTER BY
20x
 App development and speed to market

3x IMPROVEMENT
 efficiency and productivity

ACCELERATED MODERNIZATION

Modernize Legacy Code at Your Own Place

EdgeReady Cloud automatically converts your existing legacy custom code into cloud-native, microservice-enabled applications and migrates your business logic in the process, ensuring institutional knowledge doesn't get lost in the transition to a modern ERP.

BUSINESS AGILITY

Rapidly Build New Business Applications

As a low-code, rapid application development platform, EdgeReady Cloud enables experts and non-experts alike to develop robust business applications in complex ERP environments 20 times faster than traditional methods.

DIRECT, NATIVE INTEGRATION

Seamlessly Integrate into Your SAP Ecosystem

Using EdgeReady Cloud's native SAP adapters, built-in middleware, and drag-and-drop integration builder, you can easily integrate the platform with your SAP implementation and other business systems.

New route to business acceleration. At your own pace.

With EdgeReady Cloud, you don't need to wait for digital transformation. You can start to modernize your operations before or after S/4HANA migration -- at your own pace.

Using EdgeReady Cloud, organizations can quickly modernize their business processes in hours or days, as opposed to months or years.

Cleaner Core

EdgeReady Cloud separates the application layer from the SAP core, making enterprises' existing SAP systems cleaner, more standardized, more secure, and easier to maintain and migrate.

The Pillir Difference

Not all low-code solutions are born the same

Unique

- Debt discovery dashboard
- Automated ABAP conversion
- Distributed rules engine with native SAP integration
- Consumption-based pricing model

Comparative

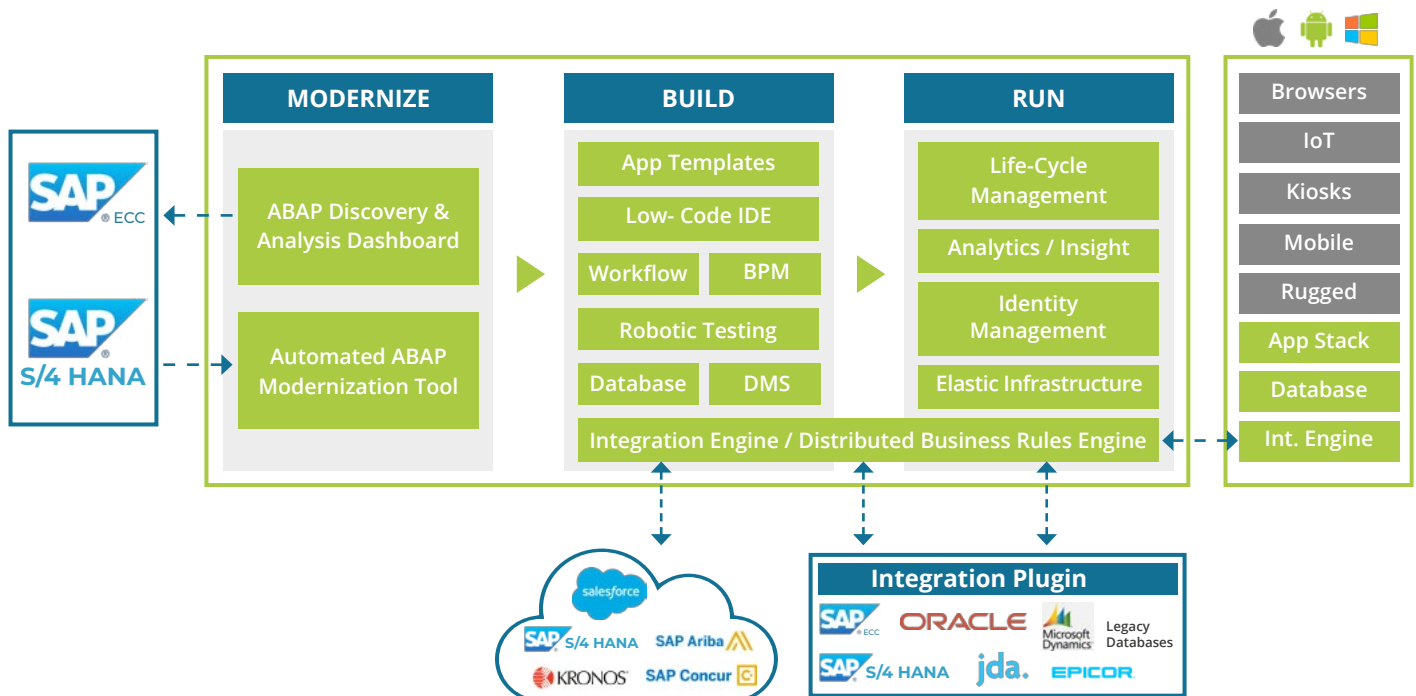

- True offline capabilities
- Cloud-native architecture
- Full SDLC with automated Testing

Holistic

- Made for SAP Experts by SAP experts
- Built inside-out from an ERP

High Level Architecture

Pillir is the developer of a low-code/no-code, cloud-native platform that enables organizations to develop mission-critical apps 20 times faster than traditional methods, leveraging the power of SAP's digital core from any device, with or without connectivity. Pillir's platform automatically converts legacy custom business processes to modern cloud-native applications, available on the web and via any mobile device. It enables organizations at any stage of their SAP journey to accelerate their digital transformation, enabling innovation at the edge while maintaining a clean SAP digital core. www.pillir.io
