## Low-code / No-code Solutions Built for SAP. Perfected for Supply-Chain.

# Pillir makes automating, extending and modernizing even the most complicated SAP custom business processes easy.

Pillir's low-code solutions for SAP-centric organizations are designed and built for your unique needs and business processes, providing quick business benefits while cleaning your SAP core.

We know that talent shortage and costs are holding back innovation and modernization, so we offer you several options to fit your specific needs:

	2. READ	-MADE APPS	3. W	E BUILD FOR YOU		
		grated, supply- utions. Customized eeds		Achieve Business value in weeks		
Pillir's solutions makes building, modernizing, and maintaining even the most complicated SAP custom business processes easy.		LOWERED BY <b>30%</b> Total cost of owners by reducing techical	ship	FASTER BY <b>20x</b> App development and speed to market		
dernizing, and maintainir most complicated SAP cu	ng even istom grations	<b>30%</b> Total cost of owners	ship	2 App deve		

Now, you don't need to wait for ERP migrations and upgrades.You can start modernizing your operations and supply-chain regardless of S/4HANA migration stage in hours or days, as opposed to months or years.

**3X** IMPROVEMENT Efficiency and productivity

## Achieve quick measurable business impact

Our customers see immediate improvements in their KPIs, including:

30%

Reduction In Material Master Maintenance Cost 99%

Reduction of 'Near Miss' Accidents (OSHA Approved) 480%

Reduction In Payroll Processing Time & Resources

## SAP-optimized low-code platform using block based programming

#### **BUSINESS AGILITY:**

#### **Rapidly Build New Business Applications**

As a low-code / no-code platform, EdgeReady Cloud enables experts and non-experts alike to develop environments 20 times faster than traditional methods.

#### **ACCELERATED MODERNIZATION:**

#### Modernize Legacy Code at Your Own Pace

EdgeReady Cloud automatically converts your existing custom code into cloud-native, microservice-enabled applications and migrates your business logic in the process, ensuring institutional knowledge doesn't get lost in the transition to a modern ERP.

#### **DIRECT, NATIVE AUTOMATIC INTEGRATION:**

#### Seamlessly Integrate into Your SAP Ecosystem

Using EdgeReady Cloud's native SAP Plugin, generate SAP compliant OData services automatically from your ECC and/or S/4HANA, for all your SAP custom objects, eliminating the need to manually build and maintain custom OData services.

### Out-of-the-box, yet tailor made to meet your needs

Utilizing a low-code platform to create new applications is easy, yet not everyone has the resources to do it. So, we made it easier. Pillir created deployment-ready application suites can be customized to your company's processes and KPIs in hours and deployed quickly. Our application suites include:

Pillir, the leading provider of low-code supply-chain solutions for SAP-centric organizations, helps companies increase efficiency, quickly adapt to changing market demands, transform their business functions, and expedite time to value at unprecedented speeds. Its award-winning low-code/no-code platform and out-of-the-box customized business applications can be deployed in hours or days even in complex IT environments. Its solutions accelerate digitization, jump-starting business innovation while ensuring a clean digital core. Pillir is the first and only company to deliver a "transform-code" platform--elevating low-code development to automatically transform legacy SAP applications into modern, mobile-friendly, cloud-native applications that run on any device regardless of network connectivity providing real-time visibility and business agility.
